-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM  
THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-36 are rejected under 35 U.S.C. 103(a) as being unpatentable over AYLWARD (US 5737902) in view of GORBY ET AL (US 5653092).

AYLWARD substantially discloses the claimed invention except for the wipers extending across the web or any surfaces vibrating.

GORBY ET AL discloses a machine and method in which articles are fed from an input surface (11) into compartments (14). The compartments pass under a wipers (48, 38, 39) disposed over the compartments and in non-parallel position to their path of travel.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to add the wipers of GORBY ET AL to the invention of AYLWARD in order to provide for a cleaner final product.

Art Unit: 3721

The combination of AYLWARD and GORBY ET AL does not disclose any surface as vibrating. However, it is well known in the art to provide a vibrating conveyor to facilitate movement of small articles and it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the combination of AYLWARD and GORBY ET AL with a vibrating conveyor to facilitate movement of the medications along their path.

3. The following prior art made of record and not relied upon is considered pertinent to

Applicant's disclosure:

- BLACK, JR. discloses a packaging machine and method in which a loading funnel is vibrated to facilitate article movement.
- HARTZWELL ET AL discloses a packaging machine and method in which a conveyor is vibrated to facilitate article movement.

Art Unit: 3721
